PROFILE
With 3 years' experience as IT Professional I am an energetic, goal-oriented and ambitious having a keen interest for a career in Software and Web Development.

My educational qualification along with practical work experience as a Junior web developer gives me an excellent foundation with regards to understanding programming and its functions so as to develop innovative solutions in response to the requirements of clients' and deliver projects in time.

I am now looking for my next opportunity within web development and am highly motivated to add value to the organisation I work with.

PROFESSIONAL EXPERIENCE
Web Developer Intern (Oct 2019-Onwards)
Ultimate Web Design Limited, New Zealand
Web application development using Nodejs, React and PHP framework- Laravel with MYSQL, jQuery, Ajax. Have also developed through WordPress and Visual Composer (Wpbakery) as per the requirements outlined by the client.

Software Developer Intern (May 2019-Oct 2019)
Talent Project-MVP Studio, New Zealand
This project was based around developing a platform where recruiter can post their job and the job seeker can apply for the advertised job. The backend functions have been created using Asp.net and React, Bootstrap, Semantic-UI-React in frontend. MongoDb database is used in the project. I mainly worked in the frontend section.

Drive Test Trainee Engineer (Nov 2012- Dec 2014)
Institute of Information & Telecommunication, Nepal
Projects completed by me were:
•Indoor and Outdoor Benchmarking:
Using Nemo Software for benchmarking of NCELL & NTC (network operator) to support building cities & highway in Nepal so as to identify the signal strength of each network and provide suggestion for improvement.
•SCFT Project:
Using Nemo software for testing the performance of different sites to identify swapping problem, voice quality, data upload and download speeds.

INTERESTS
→ Deeply interested to do yoga and meditation with music
→ Being involved with charities.
